## DATA ANALYST

+91-9962713152    subairkhan006@gmail.com    LinkedIn    GitHub

### PROFESSIONAL SUMMARY

Aspiring Data Analyst transitioning from 2 years of experience in Production and Quality within the manufacturing industry. Developing practical skills in SQL, Python, Excel, and data visualization through hands-on analytics projects. Experienced in structured problem-solving and quality-focused work, with a strong interest in data cleaning, exploratory data analysis, reporting, and business insights. Seeking an entry-level or Junior Data Analyst opportunity to apply analytical skills and grow professionally.

### TECHNICAL SKILLS

|                      |                                                                                                 |
|----------------------|-------------------------------------------------------------------------------------------------|
| <b>Data Analysis</b> | Excel, SQL, Python, Statistics, Data Cleaning, Data Validation                                  |
| <b>Visualization</b> | Power BI, KPI Dashboards, Interactive Reports, Data Visualization, Tableau, Matplotlib, Seaborn |
| <b>Databases</b>     | SQL Queries, Joins, Aggregations, Filtering, Subqueries, GROUP BY, CTEs, Window Functions       |
| <b>Excel</b>         | Pivot Tables, XLOOKUP, VLOOKUP, IF, SUMIFS, Charts, Data Cleaning                               |
| <b>Python</b>        | Pandas, NumPy, Basic Data Analysis, Data Manipulation                                           |
| <b>Other Skills</b>  | Problem Solving, Quality Analysis, Process Improvement, Documentation                           |

### PROJECTS

#### Shopping Trends Analysis Python — Pandas — NumPy — SQL — Matplotlib — Seaborn

- Analyzed 3,900 customer records to explore purchasing patterns across product categories, seasons, sizes, and customer segments.
- Used Python and Pandas for data exploration, summary statistics, and customer purchase analysis.
- Applied SQL queries, aggregations, joins, and analytical techniques to investigate shopping trends.
- Identified Clothing as the highest-sales category and compared purchasing patterns across seasons.

#### TCS Employee HR Analytics Dashboard Power BI — DAX — Excel

- Analyzed 2,400 employee records for workforce and performance analysis.
- Created KPIs for salary, experience, performance, department, gender, and location.
- Used Power BI and DAX to analyze workforce trends across departments and locations.
- Designed interactive dashboards to support HR reporting and workforce decision-making.

#### Enterprise IT Services Digital Transformation Analytics Power BI — SQL — Excel — Python

- Developed an enterprise analytics solution covering workforce, projects, sales, SLA, and service operations.
- Built interactive Power BI dashboards with KPIs, filters, trends, and drill-down analysis.
- Applied data modeling, cleaning, transformation, and aggregation for business reporting.
- Performed SQL-based analysis to extract, join, and summarize data for actionable business insights.

### PROFESSIONAL EXPERIENCE

#### Lauritz Knudsen Private Limited India 2 Years

Team Leader – Production & Quality

- Supported daily panel board manufacturing activities and production targets.
- Maintained operational reports and documentation while coordinating with cross-functional teams to resolve production-related issues.
- Conducted quality inspections and checked compliance with required quality standards.
- Analyzed production and quality issues, supported root-cause identification, and contributed to process improvement.
